Education

09/2004 - 08/2008	Bachelor at Department of Automation, Tsinghua University, Beijing, China.
09/2008 - 07/2014	Ph.D. student at Department of Automation, Tsinghua University, Beijing, China. o Advisor: Changshui Zhang. o Innovate novel Nystrom sampling technique and its applications in manifold learning.
11/2012 - 11/2013	Visiting Research Scholar at Department of Computer Science and Engineering, Michigan State University, East Lansing, MI 48824, United States. o Advisor: Rong Jin. o Proposed several online random sampling learning methods to accelerate kernel machine without losing generalization performance.
12/2013 - 7/2014	Visiting Research Scholar at School of Computer Science, Carnegie Mellon University, Pittsburgh, PA 15213, United States. o Advisor: Alexander G. Hauptmann. o Developing multi-source fusion algorithms for video retrieval.

Experience

08/2014 - 08/2015	Postdoctoral Research Fellow at School of Computer Science, Carnegie Mellon University, Pittsburgh, PA 15213, United States. o Advisor: Alexander G. Hauptmann. o Major developer of the ALADDIN project.
09/2015 - Present	Postdoctoral Research Fellow at Department of Computational Medicine and Bioinformatics. University of Michigan Medical School, Ann Arbor, Michigan 48109, United States. o Advisor: Jieping Ye. o Proposed the second order linear model and applied it in various bioinformatic and computational medicine tasks.

Research Project

08/2017 - Present	**Large-scale Optimization on GPU**

- Develop a scalable GPU computing platform for large-scale convex/nonconvex optimization
- Able to handle optimization problems that cannot be fitted into GPU on-board memory.
- Train models on very large datasets using one single GPU.
- Distributed to multiple GPUs

01/2015 - 12/2017 **The second order linear model: Theories and Applications.**

- Propose a novel model called the Second Order Linear Model (SLM)
- The SLM is able to capture high order feature interactions
- We applied SLM to Major Depressive Disorder (MDD) prediction and Alzheimer's Disease prediction.
- This project is a collaboration work with Janssen Research & Development, LCC.

07/2014 – 09/2015 **Automated Low-Level Analysis and Description of Diverse Intelligence Video (ALADDIN)**

- We developed a large-scale content-based video retrieval system with 47 features including 17 DCNN features.
- Our system ranked top-1 in 6 out of 8 tasks in MED 2014.
- This project is sponsored by Informedia@CMU.

Research Interest

1. Large-scale non-convex optimization and statistical learning theory.
2. High-dimensional high-order statistics.
3. Random Matrices and tensor machines.
4. Real-world applications in computer vision, nature language processing and bioinformatics.

Peer-Review Service

- Reviewer of International Joint Conference on Artificial Intelligence 2015, 2016, 2017.
- Senior Program Committee of IJCAI 2017.
- Reviewer of Journals:
  - IEEE Transactions on Pattern Analysis and Machine Intelligence.
  - ACM Transactions on Knowledge Discovery from Data.
  - Pattern Recognition
  - Neurocomputing.
  - Computer Vision and Image Understanding.
  - Data Mining and Knowledge Discovery
